Vision

A centralised platform for all sound clips: the **home of short sound**

Voicy is the GIPHY for sound.

"There is a communication shift happening in which short formats of content have become more important than ever before. First you had emojis, then you had Gifs and now you will have Voicies. We are the Giphy of sound: a platform to discover, create, and share short sound. Making social communication and usage more expressive, fun and direct. Voicy empowers the clip universe by centralising all sound clips within one platform, applying the latest technology and powering it with a large community."

Xander Kanon, CEO Voicy

Why integrate with Voicy?

Community

Get the newest and **most trending sound content** due to sounds created by Voicy's large and very active community of creators.

Library

With 120K+ sound clips, Voicy has **the largest library** of high quality and curated sound clips. And this number is still rapidly growing every day.

Tech

With Voicy's tech, insights & algorithms, **we make it easy for you**. Reducing your development effort to the minimum and ensuring the best UX for your users.

Over 100 million plays within Viber

"Innovation and exclusive collaborations, like the one with Voicy, enable our users to communicate in a more expressive, personalised and native way, acting as the digital form of non-verbal cues in real-life conversation, like gestures and facial expressions."

Petya Kamburova, Rakuten Viber

Voicy

Integration

One integration, covering everything

All tech, legal, and content wrapped in an SDK, ready to be used.

Features

Selection

Use soundclips for messaging and/or for posting sounds within your video.

Coming soon

Creation

Enable users to create and edit short sounds within your application. Quick and easy.

Search

Search through Voicy's library of 120K+ sounds by using a smart search algorithm.

Coming soon

Real-time

Have users play sounds real-time in your calling or video application.

Integrate with Voicy to get access to the latest sound clips
